

1 - The user has the ability to search by town, city or postcode.

2 - Use of this button allows the device to map your GPS position. Which feeds into the search to produce results for your location.

3 - The functionality for the refine filter is identical to that of the desktop. If a user comes to this section from a general page then nothing in the filters are ticked, if this is the case then the logic assumes everything is ticked. Once the user inputs their location and searches the results list will be that of all the available events and services within the default search area.

4 - Both buttons will perform the same task.

5 - When the user clicks on search the refine search functionality closes up to reveal search results list. A user can refine their search again by clicking on the arrow on the right hand side.

6 - The search results is displayed below the collapsed 'refine search' area. Events/ services are listed in distance from the user order. Each panel contains event or service details, phone number, address (exact details event specific)

The map is a jpg of the location and not an interactive google map. Clicking on a list item will result in the screen sliding to the left to open the details page of that item.

->

7 - The details page displays an interactive map, allowing the user to scroll around and zoom the map.

8 - Map pin displays the location of the event/shop/ service ect

9 - Further details of list item - this panel scrolls to reveal additional

10 - The arrows indicate the way the page can scroll.

Wireframes are not indicative of final design or nomenclature

## Search results coming from events

Search by location

W17LF

### Search Results

**Royal parks run** 1

Location: W2 2UH (1.7 miles)

Ex mei adhuc omittam, sea liber laoreet verterem cu, nobis propriae oporteat et usu. Quo quoque

**A walk in the park**

Location: W2 2UH (2.9 miles)

Ex mei adhuc omittam, sea liber laoreet verterem cu, nobis propriae oporteat et usu. Quo quoque

**Supporters run**

Location: W2 2UH (1.0 miles)

Ex mei adhuc omittam, sea liber laoreet verterem cu, nobis propriae oporteat et usu. Quo quoque

**Royal Park Run Hospice**

[View full details](#)

1 - A list of the closest 10 results will be displayed to the left of the map.

The list should be ordered with the closest at the top.

A scroll bar allows the user to view the rest of the list not displayed in the window.

Clicking on the image in the results list will highlight the relevant pin on the map. Clicking on the text will take the user to the details page (if applicable).

NB: Some results will have a details page link e.g. - shops, events, hospices

However things like 3rd party services and clinics etc will not have a details page, all information pertaining to that result will be displayed in the results panel:

Name  
Location address  
Telephone number  
email contact  
Distance  
A short text on their service.

2 - The map displays 10 locations (TBC) of events/ services in proximity to the users entered location

The position of each location relevant to the search area are depicted by the same icon, until the user either rolls over the marker or hovers over the corresponding panel in the search results list.

then a panel will open to give abridged information.

Name of location/ event  
Type

3 - The user can scroll around the map and/or zoom in or out. This will not affect the number of pins/ locations the result page displays.

1 - These fields should be editable in the CMS

Ticket Type  
Standard  
VIP  
(Extra product)

2 - This field is displayed only when the number of places left are 10 or below. A notice will be displayed to inform people that only 'x' tickets remain. The same functionality is applied to other ticket types.

NB: The maximum number of tickets which can be purchased from each ticket type is 12

3 - Once all tickets have been sold, then the sold out notice will be displayed.

The line will be greyed out and the user will not be able to make that selection.

4 - The 'Extra Products' field is editable.

eg - Buying a christmas card and dedicating it to someone - All extra products is a donation therefore it allows giftaid

Multiple products can be added through the backend CMS

### Payment summary

Total charged: £30.00  
Payment ID: 30945890

#### 1 - Form field - email address - Rules

- a) When the user fills in an event form and we find the users email address in the Just Giving database the email address field will be pre-populated.
- b) If the user clicks the "click here" link to login with a different account, then the email address field will be blank.
- b) When the user fills in an event form and we cannot find the users email address in the Just Giving database. We ask if they already have an account - If they choose this option then the email address is blank.

#### 2 - Form field - Password - Rules

This field is always blank until the user populates it

#### 3 - Form field - page name - Rules

- a) The suggested name will be populated in the field when we find the users email address in the JG database, as we will have checked the availability.
- b) If the user changes the suggested name, then when the user clicks on confirm the first action taken is to check the name availability using ajax, the page does not refresh or continue to the next stage until the name has been verified.
- If the name has been taken then the an error message is displayed informing the user. If the name is available then the user is taken to the next stage.
- c) If we cannot find the users email address in the JG database then the user is taken to the new account setup page. If at that point the user selects the option to login with an existing account the page name will be blank until the user types in their email address at that point we check the JG database and populate the field with a suggested name (if the user changes the name - see point 3b above).

#### 4 - Form field - Fundraising Target -

This field will be populated from information in our database (When applicable) relevant to their chosen event.

#### 5 - Form field - New account link -

When a user clicks on the link for a new account, then the page reloads with the non member input form.

#### 6 - Form field - Confirm button

This button takes the user to the newly setup 'Just Giving page' if the email address is blank.

#### 7 - Form field - Forgotten Password

When a user clicks on the forgotten password link the JustGiving reset password opens in a new window.

In memory | About You

## Create your dedicated In Memory fundraising Page

**JustGiving**

Create your JustGiving In Memory fundraising page

You can raise money for Marie Curie in memory of someone special through a JustGiving In Memory fundraising page.

We can create your In Memory page for you, just fill in our short form.

Tell us about the person you are remembering

Tell us their first name

Tell us their last name

Where did they live?

Their date of birth: day / month / year

Their date of death: day / month / year

Your relationship to them

Check you're happy with your JustGiving In Memory page name, or type a new one.

justgiving.com/ Available Check Availability

Next

#### Error Messages - Top Form

First name  
ERROR: Please enter their first name

Last name  
ERROR: Please enter their last name

The place they lived  
ERROR: Please enter the place they lived

The date they were born  
ERROR: Please enter the date they were born

The date they died  
ERROR: Please enter the date they died

Your relationship to them  
ERROR: Please choose your relationship to them

#### Error Messages - Bottom Field

Available  
Unavailable  
ERROR: Sorry, this web address is already taken

#### NB: Other required fields are event date, event name and attribution

event date - (todays date) - populated automatically but hidden

event name - "In memory of - (Person who died)

attribution - Hidden but populated from event name

1910 - 1951

1940 1941 1942 1943

1944 1945 1946 1947

1948 1949 1950 1951

1951

Jan Feb Mar Apr

May June July Aug

Sept Oct Nov Dec

November

S	M	T	W	T	F
	1	2	3	4	
5	6	7	8	9	10
11	12	13	14	15	16
17	18	19	20	21	22
23	24	25	26	27	28

#### 1 - Date input

When a person clicks on the date input field, the format appears in the input field box to show them how to input their DOB in the correct format should they wish to do so, a calendar also pops up to allow the user to input the date of birth, however as the dates could go back 80 years or more, it will be easier if they can pick the year first.

#### a - popup 1 Year choice

b pop up 2 Month choice - clicking on the date takes the user back to the select a date pop up

c Select the day, clicking on the Month at the top take the user back

#### 2 - Next

When clicked the button will check the users input details, if there are any errors on this page it will not progress

Checks to see all mandatory fields are present (if not it displays an error message)

Checks format of date

Once the user has input the details of the person they are creating a page in memory of. They have to click on the "Next" button to continue.

Just giving will check their db to see if they already have a person matching their records in order to link them.

#### 3 - Form field

this field allows the user to input the name of their loved ones. The field cannot have special characters or spaces.

As the user fills in the form above, we start to prepopulate the justgiving.com/page name with a suggestion based on the information the user has supplied.

We should be checking the availability of the name while we generate it.

#### 4 - If the user takes the suggestion we make based on their information, then the available notice is displayed.

If they opt to try creating their own name then the 'Available' notice becomes invisible until the user has checked the availability of the new name.

Message reads either

Available  
Unavailable

5 - Once the user has added the page name, they would like, they can then check the availability of the name by clicking the check availability link.
